Internal Research Note RN-2026-033

Biologic therapy tolerability in MS and asthma
Author: Dr. Nakamura, Immunology
Status: Draft

Neurosyn and Pulmora both carry infection-related warnings. Combined use has not been studied. Clinical staff should flag patients on both agents. Vaccination timing: live vaccines should be avoided during Neurosyn therapy and for 6 months after the last dose.

Follow-up actions: (1) update the evidence table, (2) discuss at the monthly journal club, (3) log new external references.
